

General Protection Engineering GmbH

Purpose of the company:

www.general-protection-engineering.ch

Development, together with partner, of concepts, technologies and engineering services with the goals of preventing natural and man-made catastrophes, of increasing the energy efficiency, assist development of laser-fusion energy and of high-temperature superconductivity, and propose a safe deposit of radioactive waste: consultations, publicity, marketing, and services in this wide field.

Wanted :

Partner/company for collaboration, sponsors, investors, successor :
Please contact Hans J. Scheel

On request :

- List of international lectures and publications, of granted patents and of patent applications, with 3 abstracts.
- PDF of 2 publications on Tsunami-Flooding-Barriers and their efficiency & applications 2014, 2016.
- Summary « Realistic final improved safe deposits of radioactive waste » (in German)
- Brochure « Protection against Storm Surges and Tsunami by Novel Submerged and Vertical Reflecting Barrier »
- For topic 14: WHITE PAPER, based on an international discussion group May 2012

The Logo

shows the Tsunami impulse wave (red), the reflected pressure waves (white), and the storm waves which are also reflected at the vertical immersed barrier (projects 3, 4, 12a).
